

Sophia Burak

Class 9 Teacher

Sophia Burak has been working as a teacher since September of 2016 and is excited to be teaching grade 9 again, which she has done since September of 2018. In addition to an education degree, she has completed a Bachelor of Science in conservation biology.

Sophia enjoys many aspects of science, but biology is her favourite. She tries to present material in a multitude of ways and values class discussions. Sophia always strives to show that learning can be an end in itself and a little knowledge can unlock deeper layers to everyday things.

Of course Sophia is not always teaching, and when off duty she enjoys cooking/baking, reading, and taking dance classes. Sophia also enjoys playing badminton, and it has been a real pleasure helping to grow the athletics program at the WISE, where she coaches and helps run the intramurals program in Junior High.
